

Creating a Solution Tailored to Your Needs

Catalyst Flex provides functional solutions delivered by experts in clinical operations, data management, biostatistics & programming, safety, and medical writing. We provide people, process, and technology solutions designed to meet each client's unique needs. We start by listening to your needs and designing a solution delivering anything from one to two people to full teams using your or Catalyst processes and enabled by your preferred or Catalyst provided technologies.

Clinical Operations

Clinical Research professionals across therapeutic areas with 15 to 20 years
